

OTDR Launch Cable Box---SO-OLB006

Description:

This launch box is designed to aid in the testing of fiber optic cable when using an OTDR. The unit is used with OTDR to help minimize the effects of the OTDR's launch pulse on measurement uncertainty. This box is small and easy to carry.

Specifications:

Outline size(Length*Width*Height)(mm)	190X130X75
Box Material	SR Polypropylene
Weight (kg)	About 0.6
Typical Loss(dB)	<0.65 tested @1310nm with 1000meters
Fiber Length(km)	0.5~2Km on customer requests
Operating Temperature(°C)	-40 to +55
